

## MARKET LEADER

Prime Systems are an established and growing online risk management systems provider. We supply online systems to over 70 companies, many of whom are recognised national brands, and we have an excellent track record of building long term relationships with our customers.

### CAPABILITY

- Comprehensive 'out-of-the-box' functionality
- Intuitive and simple to use
- Easy to configure to quickly meet the exact needs of your company

### VALUE

- Flexible licensing
- Customisable to suit specific requirements
- Access to expert technical support team

### LOWERS CORPORATE RISK

- Prime helps implement your policies and procedures and measures Health and Safety performance and company compliance
- Extensive management information identifies areas of risk to target key performance improvements
- Claims can be quickly fought or settled based on accurate and comprehensive information leading to a direct positive bottom-line contribution

## PRIME SYSTEMS MODULES:

Accident & Incident Reporting

Compliance Monitoring

Risk Assessments

Audit

Contractor Management

Claims Management

Document Management

The beauty of Prime is that it can be used as a single stand alone system if you just need to use one module but it also allows for future growth as the different Prime modules can integrate with each other, meaning you can build your system according to your changing needs. For example, the **Accident and Incident Reporting** module integrates with the **Claims Management** module to give you full management of insurance claims.

## OPERATIONAL BENEFITS

- Designed for multi-site operation – simple and low cost deployment and maintenance
- Prime is written by experts in their field – ensures the quality of accident and incident data and controls what actions need to be taken
- Real-time alerts on serious accidents and incidents – automated RIDDOR reporting to the HSE
- Latest versions of policies and procedures are visible to users and any changes or updates have a full audit trail
- Cloud based solution
- Multi-lingual option
- Full Action and Defect management with automated email escalation policies
- System is easily configured to match and support your risk management practices
- System measures and reports on safety targets and assists in the planning of operation improvements
- System supports and can be complimentary to both H&S management systems and ISO standards

## MANAGERIAL BENEFITS

- System monitors the day-to-day Health and Safety operation – allows managers to focus on priority issues
- Instant access to executive, operational and trend reporting – direct data export to formatted spreadsheets and graphical reports
- Flexible and customisable escalation rules
- Defends the company and its personnel from civil and criminal procedures

## FINANCIAL BENEFITS

- Effective management of risk can significantly reduce liability insurance premiums
- Assists a company's defence of claims – reducing management time, excessive claims and delivers direct cost savings
- Operates as a managed service – no IT resources required or infrastructure costs
- System provides evidence for use in both criminal and civil court proceedings
