

Analysis of Injuries in the Holiday Sector

Prime Systems is used by over 70 organisations to report accidents, many of whom are in the Holidays Sector. We have collated data from some of those companies to give an overall analysis of injuries.

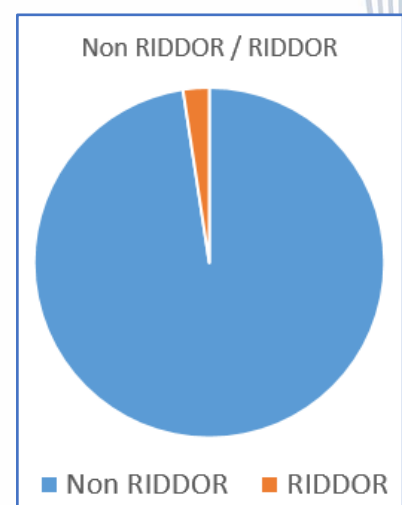

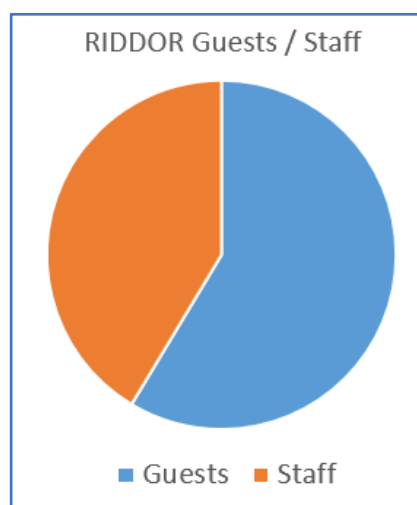

Key Facts

Data from
308
holiday parks

Over
36,800
accidents

November 17
to
October 18

Headlines

Guest Injuries

46% of guest accidents happen around the pool, gym or leisure area.

39% of guest accidents are caused by slips, trips and falls.

43% of guest injuries are cuts, lacerations and wounds.

20% of guest accidents result in head injury

Staff Injuries

35% of staff accidents happen around the club or entertainment area.

24% of staff accidents are caused by slips, trips and falls.

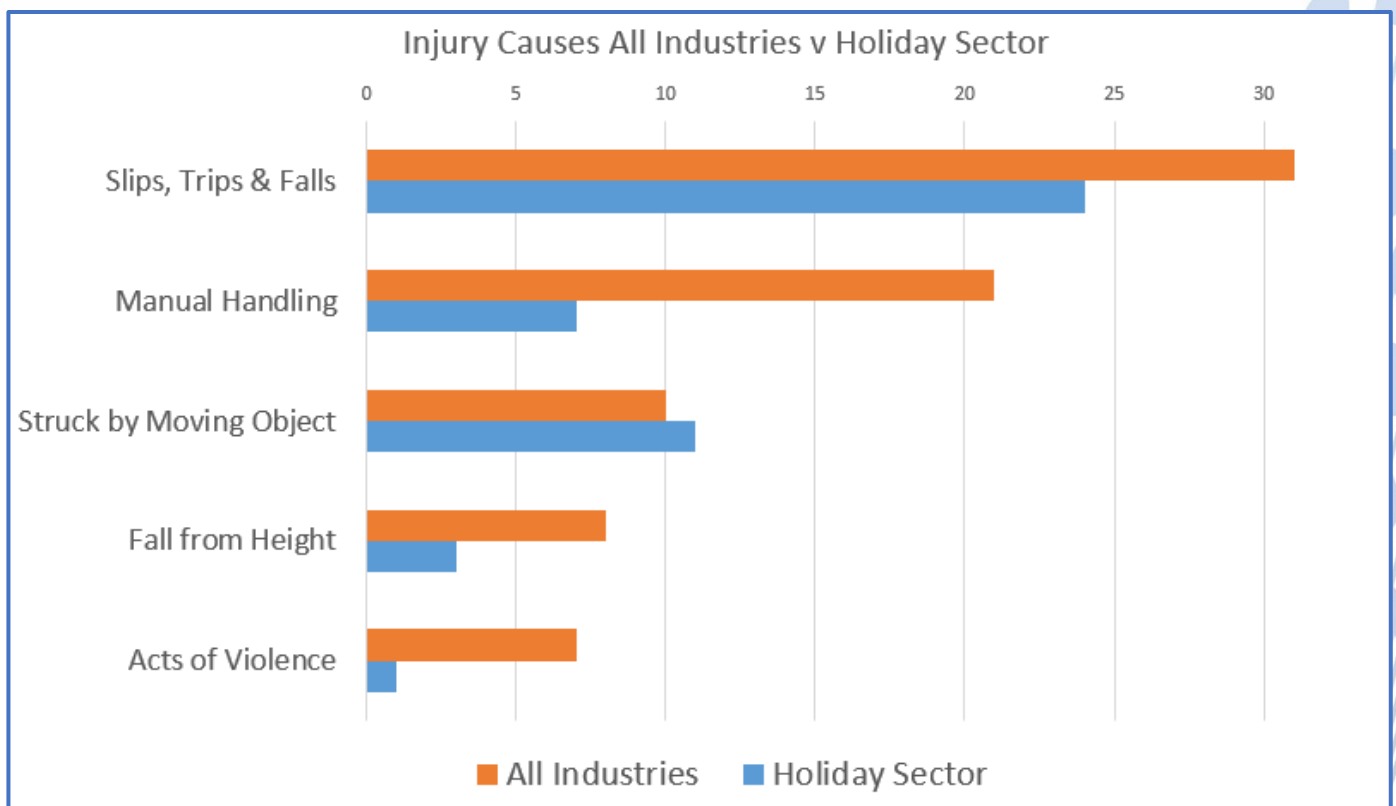

33% of staff injuries are cuts, lacerations and wounds.

18% of staff accidents result in finger injuries.

National Staff Accident Statistics

The table below shows the % of injury causes across all non-fatal injuries to people at work in Great Britain, as reported by the HSE for 2017/2018, compared to the staff injury causes identified in this Holiday Sector data exercise.

You can see that the holiday sector % totals are generally below that of the national average, particularly manual handling and slips and trips. Please note that the HSE stats are from major injuries only. Acts of Violence are often reported in Prime as “Incidents” and many lead only to minor injury, so the national stats are not quite like for like for this injury cause.

Data Analysis

By agreeing to take part in this data analysis exercise you will have also received with this summary some spreadsheets that show a more detailed breakdown of injury locations, causes, types and body areas. You can use these to compare to your own data analysis to review where you are against a broad Holiday Sector view.

Comparing to Your Data

You can use the Holiday Sector data you have been sent to compare to the following report in your own Prime system;

- Go to Report Menu
- Select Excel Reports
- Select Coverage as either Staff & Customers or select one value
- Enter your start and end dates
- Create the Summary Report

Further Information

If you want to discuss this information with us in more detail, or need help comparing it to your own Prime data, please contact us on support@prime-systems.net or call 01494 778877 and ask for Zoe Bedlow.
